Subtitle 1 :

First sub title

Type: General report

Measure	Value
Type	general
Earliest farrowed date	1989-06-26
Latest farrowed date	2019-06-26
Minimum weight	0 Kgs
Maximum weight	0 Kgs
Breeds	all
Sex	all

BREED	COUNT
Total	0

Report analysis

Memory is the place where all the complex textures and other graphics information are stored. GPU fetches the textures from the memory, processes them, send it back to RAM and then it sends it to the RAMDAC and then to your LCD Screen or monitor. RAMDAC is Random Access Memory Digital to Analog Converter which converts the image to the analog signal and sends them to your Monitor or LCD screen through display cable.

Subtitle 2 :

Male pigs report

Type: General report

Measure	Value
Type	sales
Earliest farrowed date	1989-06-26
Latest farrowed date	2019-06-26
